**Please provide summary information on the process by which this report has been prepared, including information on the types of stakeholders who have been actively involved in its preparation and on material which was used as a basis for the report**

Ad stakeholders: The Austrian Ministry of Agriculture, Forestry, Environment and Water Management invited the members of the Austrian National Biodiversity Commission to participate in the preparation and discussion of this questionnaire. [The National Biodiversity Commission was entrusted by the Federal Ministry of Environment in 1996 to coordinate and harmonize the numerous activities and programs as well as to promote the flow and exchange of information. This commission is composed of representatives from administrative departments (Federal Ministries and Provincial authorities), unions and management, science and non-government organizations (NGOs)].

The first version of this report was provided by Provincial authorities, which involved local nature protection authorities and relevant persons. The final version of this questionnaire was approved by the Austrian National Biodiversity Commission before it was sent to SCBD.

Ad material: Assessment of relevant and competent experts.

**Please provide information on any particular circumstances in your country that are relevant to understanding the answers to the questions in this report**

A wide range of activities is taking place in Austria in the realm of conserving and sustainably using biological diversity. In Austria, a number of institutions are involved in implementing the Convention due to divided jurisdiction and competences between Federal and Provincial authorities. A broad range of laws governs the various facets of protecting and sustainably using biodiversity, a term which has not been generally incorporated into the Austrian legal system. There are 9 Federal Provinces in Austria. Provincial laws relevant to the Convention on Biological Diversity are sometimes different. Beyond these domestic laws, certain European Union regulations are also relevant to the Convention on Biological Diversity.

In addition, research institutions, industry, non-governmental organizations and private persons are very active in this sector. Nonetheless, the "Red Lists" of endangered species continue to grow.

The COP has established programmes of work that respond to a number of Articles.

Please identify the relative priority accorded to each theme and the adequacy of resources. This will allow subsequent information on implementation of each Article to be put into context. There are other questions on implementation of the programmes of work at the end of these guidelines.

Biodiversity plays an important role in the framework of the Austrian Forest Inventory (Österreichischen Waldinventur - ÖWI). The Austrian Federal Forest Research Centre Vienna undertakes many projects that concentrate on forest biodiversity.

Biodiversity in agriculture (plants and livestock) is an important part of the agro-environmental programme in Austria, and offers a wide genetic basis for further breeding activities.

Our Biodiversity-Information & Education "package" - initiated by the Ministries for Education & Science and Environment - addresses and involves all kind of targets (from kindergarden, schools to University level) and partners (NGOs, communities, journalists, planners etc.) in a corporate approach. Different key issues and questions are dealt with in appropriate and popular ways.

There is a "Day of Biodiversity", organised as a model, to be "copied" by different regions, there are seminars and excursions for journalists, a "mobile research station" for children in a bus, all kinds of brochures and publications for the public as well as specific targets, collection of projects and models of good practice, special issues like "Biodiversity, food production and landscape" in cooperation with first class cooks in a program called "Gourmets for Nature" etc. The projects and seminars are carried out in 2001, the publications are published in 2002.

A special program in cooperation between schools and researchers deals with biodiversity and landscapes under the umbrella of "**Austrian Landscape Research**" (Ministry for Education and Science). For more information and publications see: <http://www.klf.at>

Although Austria is a land locked country, there is active participation for example in the framework of the Convention on the Law of the Sea, the Convention on Conservation and Management of Straddling Fish Stocks, and the Convention for the Regulation of Whaling. We nominated several Austrian experts on Marine and Coastal Ecosystems.

Please use this box to identify what specific activities your country has carried out as a **DIRECT RESULT** of becoming a Contracting Party to the Convention, referring back to previous questions as appropriate:

**1995: Establishment of the “National Commission on Biodiversity”**

As soon as the Austrian Government ratified the convention our work began to determine measures required to meet the obligations of the convention.

Recognizing the legislative and divided responsibilities for biodiversity in Austria a “National Commission on Biodiversity” was set up by the Ministry responsible for the Environment, which should

- guide our efforts on implementing the CBD
- facilitate coordination & cooperation in the many activities and programs in the field of biodiversity
- and play an important platform for information exchange on various issues related to biodiversity

This Commission is composed of representatives of

- Administrative Authorities (Federal Ministries, Provincial Governments)
- Public & Private Interest Groups (Landowner Associations, Chamber of Commerce,...)
- Scientists (Universities, Austrian Academy of Science, Natural History Museum,....)
- and last but not least representatives from NGOs (WWF Austria, Greenpeace, BirdLife, ....), which are important partners - also in disseminating information, creating awareness and influencing public behaviour and mediating our goals.

In 1997 the National Commission elaborated the first **National Report** of Austria to the Convention on Biological Diversity.

Responding to one of the key obligations for parties, the “**National Strategy**” to govern its implementation has been developed by the National Biodiversity Commission. The Austrian Government endorsed this strategy in 1998. An evaluation of this strategy is taking place.

**Please use this box to identify joint initiatives with other Parties, referring back to previous questions as appropriate:**

Within various programmes or processes in fields also relevant for biological diversity (e.g. LIFE, INTEREG, Pan-European Biological and Landscape Diversity Strategy, Ministerial Conference on the Protection of Forests in Europe) cooperation with neighbouring countries (countries with economies in transition) at the European (EU-) level takes place.

Cooperation with developing countries mainly relies on the national programmes for development cooperation.

**Please use this box to provide any further comments on matters related to national implementation of the Convention:**

Recognizing that the National Strategy on Biological Diversity will need ongoing assessments on its implementation, as well as adaptation and adjustment to accommodate new scientific findings and the latest status of biological diversity, an evaluation of the strategy has been launched in 2000. This process – which is carried out by the Federal Environment Agency and is still going on - is accompanied by the National Commission on Biological Diversity.

**The wording of these questions is based on the Articles of the Convention and the decisions of the Conference of the Parties. Please provide information on any difficulties that you have encountered in interpreting the wording of these questions**

We congratulate the Biodiversity Secretariat for this helpful questionnaire
